### PROGRESSIVE STIMULATION LEVELS – 7 STATIC LEVELS

Train your dog's nuisance barking with 7 total levels of automatically increasing static stimulations. No programming is needed as the level of stimulation increases on its own as your dog continues to bark.

### FULLY WATERPROOF FOR SAFETY

The Innotek BC-200 Rechargeable Bark Collar is built completely waterproof. If your dog loves splashing around under the rain, the collar will not take in any water and damage the internals.

### DESIGNED FOR SMALL TO LARGE DOGS

The small bark control collar should be comfortable around the necks of small to large dogs. It only measures 48mm x 34mm x 28mm and should allow your dog's neck and head to move freely.

### RECHARGEABLE NIMH BATTERY

Powered by a rechargeable NiMH battery, the Innotek BC-200 Bark Collar will save you from trips to the store to get new batteries every few weeks. Simply plug in the charger to the nearest outlet and continue using the bark collar after it charges.

### LOW BATTERY & CHARGING INDICATOR

The LED light will let you know if the battery is low by flashing red every five seconds. Plug in the charger and the light will glow red steadily while charging.

### VIBRATION ACTIVATED – ACTIVATES WITH YOUR DOG'S BARK

By detecting vibrations from your dog's vocal cords, you are sure that the Innotek Rechargeable Bark Collar only activates with your dog's bark and not from noise or other dogs' barks to keep training consistent.

### 3 YEAR MANUFACTURER'S WARRANTY

The Innotek Rechargeable No-Bark Collar is covered by a manufacturer's warranty for 3 years.
