### SMART TEMPERAMENT LEARNING MODE

The Temperament Learning Mode is a smart feature that learns your dog's barking habit and adjusts the levels accordingly. It remembers what level it used to stop your dog from barking and starts at that level when your dog barks again and gradually decreases the level if its effective.

### PROGRESSIVE CORRECTION MODE – AUTOMATIC MODE

If you don't want to complicate the process, set it to progressive and it will automatically increase the level as your dog barks and goes back to the lowest level after 30 seconds of no barking.

### USER-SELECTED MODE – MANUAL MODE

For certain training techniques, a manual setting is better. Start at the lowest level and find the best stimulation level that your dog responds to. Keep in mind that it's meant to control barking, not totally stop it.

### PATENTED PERFECT BARK TECHNOLOGY – DUAL ACTIVATION

Detects barks accurately by requiring both sound and vibration from your dog's vocal cords before it delivers stimulation.

### FULLY WATERPROOF – COMPLETELY SUBMERSIBLE

Don't worry if your dog likes to splash around in puddles or when you're watering your garden. The PetSafe Big Dog Rechargeable Bark Collar is completely waterproof and submersible.

### RECHARGEABLE – UP TO 6 MONTHS OF ON TIME

With up to 6 months of use on a single charge, you won't need to worry about constant charging every few days. The PetSafe Big Dog Rechargeable Bark Collar uses only the finest quality Lithium-Ion Battery.

### BATTERY STATUS AND STIMULATION MODE – DIGITAL DISPLAY

Determine your battery level, stimulation mode and stimulation level (user-selected mode) with the digital display on the PetSafe Big Dog Rechargeable Bark Collar.
